PROFILE

AI Product Engineer with an M.Sc. in Artificial Intelligence and 8+ years of software engineering experience. I build LLM integrations, MCP servers, and API connectors across CRM platforms and third-party APIs. Data is pulled from source and verified before it drives any AI action. Give me an integration brief; I ship something reliable, testable, and ready to scale.

EXPERIENCE

AI Product Engineer & Founder

nourin.dev

March 2025 – Present

Remote

- Shipped **Meta Ads MCP**: a TypeScript/Node.js MCP server that exposes Meta's Marketing API to Claude for conversational campaign management (pausing, budgeting, cross-campaign reporting). Data is pulled from source and verified before each AI action.
- Built **OpenClaude**: an open-source multi-agent runtime (10 autonomous agents, staggered heartbeats, Telegram/Discord/Slack/WebChat adapters) packaged as a single Docker image with docker-compose: named volume for persistent memory across restarts, hot-mounted skill files, health check endpoint, and restart: unless-stopped; runs anywhere Docker runs, including a client's own servers. Includes an autonomous social agent (Irina) that posts daily and improves its own prompts against a test suite.
- Delivered **Handraiser**: a production SaaS (handraiser.app) with Row-Level Security, RBAC, and automated weekly digests via Supabase Edge Functions and pg_cron. Includes a Cloudflare Worker for 24/7 custom link tracking and a dedicated MCP server for conversational access to lead data.
- Engineered **4C Analyzer**: an AI engine that audits product pages and conversion funnels, then layers in live GA4, Microsoft Clarity, and Meta Ads data via daily cron. Claude analyses the unified feed and surfaces one prioritised, data-verified action for the client each morning.
- Shipped **YouTube Scriptwriter Agent**: a 4-step AI pipeline (Claude 3.7 Sonnet thinking mode → Perplexity Sonar research → Claude Opus outline → full script), with a fact-verification layer checking 44 claims per run, inline citations, and immutable version management. Built for a media client; in production.
- Built a content pipeline for **Serenova Home**: ingests product photos and publishes 5× daily branded posts across social channels.

Machine Learning Researcher

University of Windsor

May 2022 – January 2025

Windsor, ON, Canada

- Built and validated ML pipelines across 13 datasets in 3 data formats; reduced 122 clinical variables to a minimal predictive set without accuracy loss.

Senior Software Engineer

Therap Bangladesh Ltd.

Nov. 2016 – Aug. 2021

Dhaka, Bangladesh

- Migrated legacy healthcare modules to Spring MVC and Hibernate JPA, improving maintainability by 40% and cutting response times by 25%.
- Automated Excel imports, reducing multiweek manual processes to one minute, increasing module adoption by 80%.
- Optimised SQL queries and indexing across a database serving 300+ healthcare agencies, cutting report generation time significantly.
- Led Agile sprints for a cross-functional team, delivering features on schedule across a regulated healthcare platform.
- Worked directly with healthcare clients on requirements and demos; translated complex needs into working software.

EDUCATION

M.Sc. in Computer Science (Artificial Intelligence

May 2022 – January 2025

Specialization), University of Windsor

Thesis: Optimizing Longitudinal Data Representation to Predict Clinical Scores Using an End-to-End Machine Learning Pipeline: A Case Study in Parkinson's Disease

B.Sc. (Engineering) in Computer Science & Engineering,

Jan. 2012 – Oct. 2016

Shahjalal University of Science and Technology

ENTREPRENEURIAL VENTURES

Rentee: Housing Solution for Newcomers (May 2023–August 2023). Founded a platform addressing housing challenges for Canadian newcomers. Validated with 50+ users and secured \$10,500 CAD in grants (EPICenter Founder Program + VentureWomen).

Personal Support Plus (PS+): Healthcare Innovation Venture (February 2023–July 2023). Co-founded a venture improving support worker welfare and elderly care. Secured \$4,300 CAD across two pitch competitions ('Take Your Shot' + VentureU).

Playnest: Versatile Children's Furniture (November 2024–Present). Co-founded an affordable multifunctional children's furniture company. Currently generating \$2,000+ revenue per month.

- N. Ahmed, N. Vij and Z. Kobti, "Comparative Study of LBP and HOG Feature Extraction Techniques for COVID-19 Pneumonia Classification," *IEEE Symposium on Computers and Communications (ISCC)*, 2023, pp. 1–6, doi: 10.1109/ISCC58397.2023.10217997.

TECHNICAL EXPERTISE

AI Engineering

MCP Protocol (stdio + HTTP), Docker/Containerisation, LLM Orchestration, Claude API, Claude Code, AI Agents, RAG Systems, N8N, LangChain, OpenRouter

Integrations & APIs

OAuth 2.0, REST APIs, ETL Pipelines, Meta Marketing API, GA4, Microsoft Clarity, CRM & SaaS API Integrations

Software Development

Java, Spring MVC, Hibernate, SQL, Git, CI/CD, Agile/Scrum

Programming Languages

Python, TypeScript, JavaScript, Java, SQL

Tools & Environments

Node.js, Linux, GitHub, Supabase, Cloudflare Workers,
Jupyter, Pandas

ML Frameworks & Libraries

TensorFlow, PyTorch, Keras, scikit-learn, LSTM Networks,
Time-Series Analysis

AWARDS AND RECOGNITIONS

- School of Computer Science Departmental Scholarship – 2022
- University of Windsor Master's International Entrance Scholarship – 2022
- EPICenter Founder Program Grant – 2023
- VentureU Pitch Competition Winner – 2023
- 'Take Your Shot' Business Pitch Competition Winner – 2023
- EPICenter VentureWomen Program Grant – 2024
